HILL®**

TATAMI

www.greenhillsports.com

Description

Tatamis are designed for various kinds of performance and training. When it comes to martial arts, specialized floor coverings are especially relevant. This product has a number of advantages in the form of floor protection during training sessions, as well as an element of safety for athletes at the time of performing various exercises.

GREEN HILL is a manufacturer and offers many different flooring options for gyms and tatami mats without intermediaries. Thanks to its special composition, the covering can be easily expanded to different floor areas.

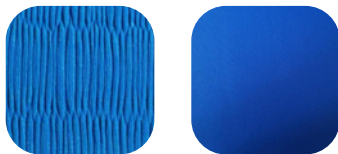

Tatamis are made of a certain material with high wear resistance. The anti-slip coating securely fixes the tatami in one place. The special rigidity of the tatami allows it to spring under load and regain its original shape, which guarantees the safety of athletes during training
